INDEX TO VOLUME 21

The index covers only the major papers, their authors, and principal headings. It does not include the abstracts. For the latter there is a separate index to authors on pages 1047 through 1052. Minutes of business meetings, officers, and reports are entered only under American Society of Zoologists.

Abstracts, see note above.
  Index of authors, annual meeting, Dallas, Texas, 1047–1052.
  Of annual meeting, Dallas, Texas, 911–1052.
Adkins-Regan, Elizabeth, Hormone specificity, androgen metabolism, and social behavior, 257–271.
Agui, Noriaki, see Gilbert, Lawrence I. *et al.*
American Society of Zoologists,
  Committees, 317.
  Divisional officers, 318.
  Minutes of annual business meeting, 319–320.
  Officers for 1980, 317.
American Zoologist,
  Directions for authors, cover 1.
  Editorial board, cover 1.
  Subscriptions, cover 1.
Analysis, functional-adaptive in systematics, 1–108.
Anders, Annerose, see Anders, Fritz *et al.*
Anders, Fritz, Kamalesh Chatterjee, Manfred Schwab, Eberhard Scholl, and Annerose Anders, Tumor gene expression and interphase chromatin appearance in *Xiphophorus,* 535–548.
Arnold, Arthur P., Logical levels of steroid hormone action in the control of vertebrate behavior, 233–242.
Ballard, William W., Morphogenetic movements and fate maps of vertebrates, 391–399.
Balon, Eugene K., Saltatory processes and altricial to precocial forms in the ontogeny of fishes, 573–596.
Bennett, M. V. L., D. C. Spray, and A. L. Harris, Electrical coupling in development, 413–427.
Bock, Walter J.. Functional-adaptive analysis in evolutionary classification, 5–20.
Bock, Walter J., Introduction to the symposium: Functional-adaptive analysis in systematics, 3.
Bollenbacher, Walter E., see Gilbert, Lawrence I. *et al.*
Boulekbache, Habib, Energy metabolism in fish development, 377–389.
Bowers, William S., How anti-juvenile hormones work, 737–742.
Bowers, William S., see Madhavan, Kornath *et al.*
Brown, James H., Two decades of homage to Santa Rosalia: Toward a general theory of diversity, 877–888.
Buys, Cunera M., see Gilbert, Lawrence I. *et al.*
Chatterjee, Kamalesh, see Anders, Fritz *et al.*
Cherbas, Lucy, see Cherbas, Peter *et al.*
Cherbas, Peter, Lucy Cherbas, Charalambos Savakis, and M. Macy D. Koehler, Ecdysteroid-responsive genes in a *Drosophila* cell line, 743–750.
Cioffi, Moira, see Harvey, William R. *et al.*
Cox, Cathleen R., Agonistic encounters among male elephant seals: Frequency, context, and the role of female preference, 197–209.
Cracraft, Joel, The use of functional and adaptive criteria in phylogenetic systematics, 21–36.
Crews, David and Neil Greenberg, Function and causation of social signals in lizards, 273–294.
Davey, Kenneth G., Hormonal control of vitellogenin uptake in *Rhodnius prolixus* Stål, 701–705.
de Wilde, Jan, Ecological reflections on insect neuroendocrine activity, 625–630.
DEVELOPMENTAL BIOLOGY OF FISHES, 321–604.
  Anchovy organ development, 429–445.
  Developmental genetics of fishes, 549–572.
  Electrical coupling, 413–427.
  Energy metabolism in fish development, 377–389.
  Fish development: Present and future, 597–604.
  Gene expression and chromatin in *Xiphophorus,* 535–548.
  Growth of fish retinas, 447–458.
  Introduction, 323–324.
  Locomotion of *Fundulus* deep cells, 401–411.
  Mechanisms of fertilization in fishes, 359–375.
  Mechanisms of hatching in fish, 459–471.
  Oocyte growth in teleosts, 325–343.
  Piscine viviparity, 473–515.
  Saltation and altricial to precocial forms, 573–596.
  Teleost testis, 345–357.
  Teratology and early fish development, 517–533.
  Vertebrate morphogenetic movements, 391–399.
Diakow, Carol and Denise Raimondi, Physiology of *Rana pipiens* reproductive behavior: A proposed mechanism for inhibition of the release call, 295–304.
Ecology, theoretical, 791–910.
Erickson, C. A., see Trinkaus, J. P.
Fisher, Daniel C., The role of functional analysis in phylogenetic inference: Examples from the history of the *Xiphosura,* 47–62.
Fishes, developmental biology of, 321–604.
Floody, Owen R., The hormonal control of ultrasonic communication in rodents, 129–142.
Fox, Laurel R., Defense and dynamics in plant-herbivore systems, 853–864.
FUNCTIONAL-ADAPTIVE ANALYSIS IN SYSTEMATICS, 1–108.
  Evolutionary classification, 5–20.
  Functional and phylogenetic methods in mammalian studies, 37–45.
  Horseshoe crab phylogeny, 47–62.
  Introduction, 3.
  Pharyngognath teleosts, 83–101.
  Phylogenetic systematics, 21–36.
  Phylogeny of deuterostome coelomates, 63–81.
  Summary and comment, 103–108.
Geyer, Lynette A., Ontogeny of ultrasonic and lo-

comotor responses to nest odors in rodents, 117–128.
GIBBS, DANIEL, see GILBERT, LAWRENCE I. *et al.*
